

CERTIFICATE OF ANALYSIS

RIBBED SMOKED SHEETS (RSS)

- A natural rubber, consisting essentially of cis-1,4 polyisoprene with small amounts of non-rubber constituents (proteins, lipids).
- The rubber is processed by deliberate coagulation.
- Coagulated with Formic acid.
- After coagulation it is washed, sheeted and dried by smoking or air drying.
- Inspection, grading and baling.
- The rubber is graded and inspected visually, according of the terms of conditions as laid down in: "International Standards of Quality and Packing for Natural Rubber Grades" (The Green book), issued by The Rubber Manufacturers Association, and traded on these terms.
- When this rubber is kept under optimum conditions the shelf life practically not limited.

	Characteristics RSS-3
Dirt	Max 0.05%
Ash	Max 0.60%
Volatile Matter	Max 0.80%
N2	Max 0.60%
Po	Min 30
Pri	Min 60
